GERMAN CLEAN AND CARE

Instructions for Use: Soap

Travel Soap – All-in-1

1. Highly concentrated; just a few drops are enough
2. Suitable for the body and hair, dishes, or laundry.

While on a trip, you can wash performance underwear, merino wool products, socks, and similar items with Travel Soap.

However, due to its high content of skin-nourishing ingredients such as panthenol, vitamins, and oils, we do not recommend it for washing membrane clothing (hard- or softshells).

Ideally, Travel Soap should not be used in standing water.

Travel Soap breaks down more quickly in soil than in water.

Recommended use at a lake: Get your body wet in the lake, lather up with Travel Soap on shore, and rinse off with water there as well.

3. Completely biodegrades in nature within 30 days, The soap is readily biodegradable according to OECD 301F, as tested by a laboratory accredited under DIN EN ISO/IEC 17025.
4. Produces little foam
